

Hatchery Pine

Harvest Prescription: Red pine row thinning (First Thin).

Cutting Specifications:

Harvest every third row.

Most rows are designated for cutting with double dots marked at the beginning of the rows.

All harvested trees must be utilized down to a 4 inch top

All conifer stumps cut between April 1st and December 1st must be treated to prevent HRD.

Approximately 10 cords of oak and 25 cords of jack pine will be scaled as red pine.

Do not cut trees marked with blue paint. Do not fell trees across the blue paint line.
